

Operating pressure max. 350 bar/min 100 bar

Hydraulic hollow piston cylinders can solve many clamping problems because they can also be used as pulling cylinders due to the hollow piston combined with a tie rod. The double action principle allows short stroke times and high retraction forces, i.e. clamping forces in the reverse stroke direction.

Technical characteristics

- Piston with through-hole and with internal thread
- 2 fastening threads at the base
- Lateral hydraulic connections

CUSTOMER DESIGNED MODELS

If you need a special cylinder for your application – customer designed models are available. PLEASE LET US KNOW!

Important note

The operating pressure should not exceed 250 bar if the piston is actuated without a counter force.

Recommended accessories (separate order)

2 straight screw connectors D8S-R1/4
